Experience

GS&F

Nashville, TN

Junior Software Developer

December 2024 - Present

- Built and shipped production web experiences in **React/TypeScript** for multiple clients using **Contentful, Strapi, and WordPress**.
- Created reusable components and CMS-driven sections to speed up page launches and content updates while keeping UI consistent.
- Partnered with designers and PMs in an agile agency workflow, shipping features through pull requests, QA cycles, and iterative releases.
- Improved performance and UX through responsive implementation, cross-browser fixes, and front-end debugging.

Projects

[Crosi.co](#)

2026

- Built Crosi to simplify a personal workflow, making it easier to prepare and cross-post one video across YouTube, TikTok, and Instagram.
- Developed a responsive upload dashboard with React, TypeScript, and Tailwind CSS, including video upload, captions, platform options, loading states, and error handling.
- Built OAuth-based posting flows for YouTube, Instagram, and TikTok, with upload validation, error handling, and deployment through Firebase, Prisma, PostgreSQL, and Vercel.

[Portio](#)

2025

- Built and published **Portio**, an iOS calorie tracking app in **Swift/SwiftUI** with photo-based food logging and guided onboarding.
- Integrated **Firebase Auth, Firestore, and Storage** to support user accounts and securely sync per-user data across devices.
- Implemented an AI vision pipeline using **OpenAI** to analyze food images and return structured nutrition results, including validation and fallbacks for low-confidence outputs.
- Secured secrets by moving API keys off-device and retrieving them via a backend **cloud function**, preventing exposure in the client app.

[TimeCapped](#)

2024

- Published **TimeCapped**, a Swift/SwiftUI photo journaling app that lets users capture daily moments and view them over time.
- Implemented authentication with **Firebase Auth** using **Sign in with Apple** for account creation and secure sign-in.
- Integrated **Firebase Storage** and **Firebase Storage** to store entry metadata and securely upload/persist user photos, including upload progress and failure handling.
- Added polished, lightweight animations using the **Pow** Swift package to improve transitions and overall UX.

Skills

JavaScript | TypeScript | React | SwiftUI | Firebase | Strapi | Contentful | WordPress | Git

Education

University of Tennessee at Chattanooga

Chattanooga, TN

B.S. Computer Science (Software Systems)
